

## Already a Premiere Pro Pro?

*or at least you've had some experience and don't really need a tutorial?*

Your job: Make a film from the footage you took following these brief specifics...

1) Choose one scene you filmed:

the one you filmed last week (found here: *Public > IB Film > \_First film (testing, testing)*)  
or this week's film (found here: *Public > IB Film > \_First film (1, 2, 3...)*)

2) Create/save your new project in your group's folder and name your project your last name.

3) And make a **black & white silent film!**

Add **music and sound effects** to help tell the story.

For this assignment, you may use any music or sound effects, but if you are **testing in IB Film** you should use non-copyrighted sources

- here's a good [list of sound effects](#) sites & a good [music site](#)

- for most of these you need to register for an account, as long as they don't ask for too much info, do it - and also, when there's the option, choose "for educational purposes"

And **add title cards** as needed.

4) Take your time, I want to see what you can do... add effects, transitions, text, choose a tone (I already gave you the black & white/silent theme - but see what you can do to create a film you like, a film that tells a story, etc.)

5) If you want to sort the clips/rename them, etc. - create a new folder within your group's folder with your name and COPY the footage there, then make your changes)

6) Export your final film here (your last name as the title of the film): *Public > IB Film > Premiere Pro Tutorial Films*
