

Explain a thing or two that you wish you/your production team/etc. did differently, thought more about, gave more time, etc. in making this film...

More planning!

We **needed a couple transition shots** and maybe **one more day of editing**.

We could have filmed **multiple takes** for each scene so we could have edited together only the best takes.

We should've spent **more time on a storyboard** to make sure the story made sense

We could have **added more background** into our story that would have made it more clear.

Zooming in and out of characters could be smoother

Wish we would have finished earlier so we could have had **more time to edit**.

I wish we had a little **more time to edit** I feel like we could have added a few more final touches.

We should have **edited the script, not just the movie**.

More thought to the **location of filming**

I wish we would have put more **thought into setting**.

I wish we spent some **more time on the plot**.

I wish we gave **more time to film out outside of school** scenes.

Following the storyboard my accurately would have helped our overall storyline.

I wish we had the ability to make our scene **really show that we were in a diner**.

Also would've been better if we **worked on our final scene**.

I wish we had made the movie **more smoothly and less choppy** with the music

A thing that I wish went differently is that i wished we **incorporated more context for our characters**, and that we made our title cards more interesting.

I wish we had **filmed more shots of the same scene**, would be good for editing.

There were a few times where **some of us weren't at school** so that made it hard to film sometimes

I wish we had **planned out our shots** a little bit more. At some points we were just "free-handing" it.

Better plot, expand on areas where you are running

I wish that my group was **more open to ideas**, and that our focus was more on integration of all parts of the video.

I wish we had **filmed a close-up shot** of me signing the agreement, we forgot about that scene. I also wish we had thought about how to make the time travel experiment plot point more clear.

I wish that we had spent **more time on editing** and less on filming

I wish we filmed a lot sooner so we could have **edited it better**

Maybe for the last part, we could have **filmed more clips** to tell the viewer what is happening.

We could have **all pitched in with the editing** rather than having one person do it

It would have been better if we gave **more time for editing**

We **did not work that well as a group**. The work was not divided up well.

Camera work/shot variety, Planning/Story, Setting, Editing & Transitions, Other

Note on SOUND: there were no notes regarding sound because you were instructed to make a silent film. BUT, please give this thought for your next film; it matters and can help tremendously tell you story on many levels.
