

Make a Movie Poster for your March Film

Make your own from **scratch** (via Illustrator, Photoshop, etc.?).

Try [Adobe Spark](#) (it's not part of the Adobe Suite on the classroom computers, but it's free – sign-up via Google or your email).

Or try one of the many **free online movie poster makers** (do a search, there are many; find one you don't need to sign-up for - makes it easier – and one that allows you to save the poster/image you create).

Include things like: title, production roles, a tag line?, actors, producers?, and images (you have many on your blogs – or grab one from your Premier Pro project)

Then download and save the poster - and email it to bacone@issaquah.wednet.edu or put it in the 'Public Server > IB Film > _March Film > _movie posters with your name as the title.
